

MapQuest

For the dreamers

D.P.S VASANT KUNJ

01

THE PROBLEMS.

02

Explorers in the wild are often faced by a scarcity of food.

Even veteran explorers find themselves unable to navigate their way through the jungle.

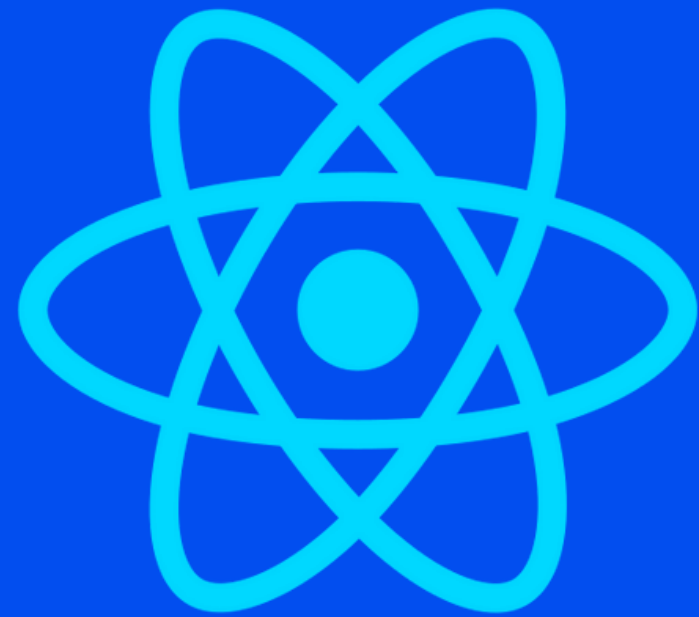

THE SOLUTIONS.

- A map which helps guide the users through rough terrain or simply navigate through the city.
- Food markers to tell you the nearest food locations.
- Integrated food detection software for all the explorers out there to check if the food is edible or not.
- Get specialised survival tips in unfamiliar locations at the click of a button.

FUTURE PLANS

- Building a worldwide database so that we can expend the capabilities of our map, to every corner of the globe.
- Providing aspiring explorers and mountain climbers a platform where they can build their foundations.
- Building a worldwide community of explorers where they can share their experiences, and rookies connect with the professionals.
